Computer Note	<p>Kindly send the book with your son/daughter.</p> <p>Central to our approach is the belief that children learn most effectively when they are engaged in design, construction and interactive activities. Our leading school took advantage of this by opening the Robotics class and providing it with a set of tools to implement various activities which provide an excellent and unique learning design experience on an integrated system that includes mechanics, electronics, and computation. Accordingly, the Robotic Class will be held starting from this week</p>

	during one of the computer periods as will appear in the weekly plan.
